ACADEMIC PERFORMANCE (UPDATED DECEMBER 2004)

A school's academic performance gives some insight into how well the student body is being educated. While the academic performance of a school has no bearing on individual student success, it is a good indicator on whether or not a school is providing an environment that fosters good test scores and significant academic achievement.

STAR 2004 (STANDARDIZED TESTING AND REPORTING)

The STAR program is to help measure how well students are learning basic academic skills. Star Program consists of up to four separate tests: California Standards Test (CST), California Alternate Performance Assessment (CAPA), California Achievement Test, Sixth Edition Survey (CAT/6 Survey) all subjects and California High School Exit Examination (CAHSEE)

PROGRAMS / CLASSES

The right combination of classes and academic programs offered by a school can fuel a student's desire to learn and progress. While some schools place more of an emphasis on text book readings, others have integrated real world experiences and technology into their base curriculum. The best teaching philosophy is going to be the one that registers with your child's interests and overall learning style.

FINE ARTS

In addition to allowing a student to express themselves in a positive forum, fine arts education teaches students how to create, understand, and evaluate art forms created by others. Combined with language, math, and science, fine arts education contributes to a well rounded curriculum.
